Proprietors Suzanne Alewine and Doris Boeckman and their staff provide technical assistance to identify tools and resources to sustain community and organizational processes and interventions, develop effective communication strategies, and utilize technology for effective change and/or cost efficiencies. Their energies are directed at organizational development, particularly within the realm of community development, non-profit associations and organizations. Community Asset Builders also provides the following additional services: program evaluation, event planning and management, strategic planning and resource development.

Expertise Summary

Evaluation: Evaluators for several initiatives for Missouri non-profits (local, federal and foundation funded initiatives).

Finance Management: For association clients, we have demonstrated results through increased revenue, increased efficiencies, increased membership, increased conference participation, and increased accountability.

Strategic Planning: Expertise in strategic planning that includes surveys, SWOT analysis, facilitating planning sessions, focus groups and data analysis.

Resource Development: Award of more than \$50 million to Missouri non-profit clients from local, state, federal and foundation funding sources.

Technology: Maintenance of three websites.

Community Assessment: Completion and publication development of more than thirty community assessments.

Program Evaluation Experience

Butler County Health Department (2004-present) Evaluation services for Missouri Foundation for Health funded grants: 1) Healthy and Active Communities; and 2) Tobacco Prevention & Cessation grants.

Katy Trail Community Health (2008-present) Program evaluation services for the federally-funded Rural Health Outreach grant for integration of primary care services, behavioral health and senior services in Benton County. and HRSA Small Health Care Provider Quality Improvement grant.

Katy Trail Community Health (2008-2010) Developed outcomes tool for tracking program outcomes. Analyzed data and generated the annual reports that reflect trended outcomes data.
